

Work-Base Activity Plan

Mission Statement:

The mission of Manatee Technical College is to produce highly skilled individuals and resourceful leaders through collaborative education to meet the ever-changing needs of our communities and the workforce.

Vision Statement:

The vision of Manatee Technical College is to be recognized as a leader in transforming people's lives through quality education.

Work-Base Activity Plan

Manatee Technical College provides work-based activities to their students in many programs. Work-based activities are required by some program standards and optional for others. They are actively encouraged by all programs and aid as a path to employment. The work-based portion of any program enhances and applies the instructional competencies learned in the classroom. Students develop interpersonal, communication skills, real world hands on training and employability/soft skills needed to secure a position in the world of work.

Work-based activity sites are approved by the School Board of Manatee County for some externships in the medical and public service programs. These work-based Activity Agreements with the sites are signed by the School Board and the agencies themselves. Students are assigned sites by their instructors or by the Lead Instructors. Other work-based activity programs are coordinated by the instructors for the students, such as Industrial Cooperative Education and Business Cooperative Education (ICE/BCE). In this on-the-job training, the instructor collaborates with assigned site personnel to ensure that students meet identified curriculum competencies and has the authority to discontinue the training of any student if deemed appropriate.

Students who are in a paid work-based activity location communicate with their instructor who coordinates with the students' supervisor to assure program competencies are met. Pre-defined goals are established prior to the work based activity onset. An agreement is signed by the student, instructor and work-based site supervisor.

Objectives

1. Apply competencies learned in the classroom to the work-based site.
2. Demonstrate employability skills.
3. Apply management skills in the workplace.
4. Demonstrate positive human relations and leadership skill in the workplace.
5. Demonstrate ethical business behavior.

Evaluations

1. The work-based site will complete an evaluation of the student to be submitted to the instructor at intervals determined by the program instructors. Students are ranked on their personal and professional trait, as well as their work habits and abilities.
2. Students complete an evaluation upon completion of the work-based activity based on their experience with the agency and effectiveness of the activity.
3. All final evaluations are the responsibility of the program instructor, based on instructor observations and the input from the student's work-based activity supervisor.
